

2400 Workstation

Point of Sale System

The 2400 POS Touch Workstation is an all-in-one system designed to deliver high performance, superior reliability and exceptional value. A large, durable PCAP touchscreen, fanless design and multiple configuration options makes the 2400 the perfect solution for the most challenging retail environments.

Greater Flexibility

- The standard configuration includes a powerful Intel Alder Lake N97 processor, 8 GB of memory and a robust 128 GB solid state storage drive which will provide optimal system processing for any retail application.
- A true flat 15.6" widescreen touch monitor provides a bright, easy-to-read display that is perfect for any POS application.
- The Projected Capacitive (PCAP) Touchscreen is extremely durable and highly responsive and can meet the challenge of the most demanding retail environment.
- A variety of configuration options are available including wireless and Bluetooth, an integrated MSR, 1x12V and 1x24V powered USB ports and a 11.6" widescreen customer facing rear LCD display.

Better Reliability

- A fanless design increases overall product dependability by eliminating a potential failure point and provides for quiet system operation.
- A durable platform with a stable base provides the perfect hardware solution for the toughest retail environments.
- No system vents are needed so the electronics are protected from dust and liquid spills ensuring continual operation
- A smart design with easy access to key components such as system memory, hard drive and connectivity ports provides retailers with efficient operation.

Enhanced Sustainability

- The electronics are designed with a low power consumption mobile chipset reducing system energy needs without reducing processing power.
- A standard 3-year manufacturer's warranty provides retailers with peace of mind so they can focus on their retail business and not their POS systems.
- Connectivity includes 7 USB ports and 3 Serial ports ensuring retailers' POS peripherals can be supported.
- All ports are clearly labeled ensuring fast set-up and efficiency when changing peripherals.
